

Duration : 3 Hours

Marks : 80 Marks

- N.B. : (1) Question No 1 is Compulsory.
 (2) Attempt any three questions out of the remaining five.
 (3) All questions carry equal marks.
 (4) Assume suitable data, if required and state it clearly.

- Q.1 Solve any four.
- Compare and contrast Boolean Model vs Vector Space Model. **5**
 - Specify the significance of User Relevance feedback in an IR system. **5**
 - Explain inverted file indexing with suitable examples. **5**
 - Explain the process of Structured Text retrieval model. **5**
 - Illustrate different types of keyword-based queries. **5**
- Q.2
- Draw the taxonomy of IR models and explain any one IR modeling technique. **10**
 - What is the significance of **tf** and **idf** ? How can you calculate **tf** and **idf** in a vector model? **10**
- Q.3
- Explain the various system related issues faced in Information retrieval systems and how they can be refined for a deployed system. **10**
 - State the different types of queries. Explain the pattern matching query concept with an example . **10**
- Q.4
- What is the role of suffix array and suffix tree in information retrieval system with example. **10**
 - What is Latent Semantic Indexing model ? Write the advantages of Latent Semantic Indexing Model? **10**
- Q.5
- Define Multimedia information retrieval. Discuss indexing and searching. **10**
 - What is the difference between Unranked Retrieval models and Ranked Retrieval models. **10**
- Q.6 Write short notes on any two. **20**
- Information Retrieval in digital libraries.
 - Sequential Searching.
 - Flat browsing vs Hypertext Browsing model.
 - Distributed Information Retrieval.
-
